

**H.S.A
PHILIP C. MEUSE
MEMORIAL ARCHERY RANGE**

Information and Guidelines:

The new practice range consists of a single firing line and 5 individual target stands. The target stands are set at 10, 20, 30, 40 and 50 yards from the firing line. (Please refer to the attached sketch (PDF) showing the range layout) ***Archers must stand at the firing line when shooting.***

There are 5 'bag' targets in the clubhouse to be used on the range.

Recommended use as follows:

- 2 small targets (Redhead brand 'Deluxe' targets) intended for the 10 and 20 yard target stands.
- 2 medium targets (Redhead brand 'Magnum' targets) intended for the 30 and 40 yard target stands.
- 1 large target (Morrell brand 'Supreme Range Target') intended for the 50 yard target stand. This is the largest target and offers the best backstop. It also requires two sets of hooks which are provided only at the 50 yard target stand.
- All targets are kept in the clubhouse when not in use. Members have access to them and they can be easily moved out to the range by using the two-wheel hand truck that is provided. (the Morrell target may require two people to move it and hang it on the target stand)
- Targets are to be attached to the hooks and chains, using the grommets on the targets.

Use as many targets as you require when shooting, one target can be moved to different target stands as needed.

Access to the woods beyond the range is now provided by a new trail through the woods, starting near the utility poles at the firing line. (Please refer to the attached sketch)

When you are returning from the woods, please DO NOT go pass the new gates along the cart path! Follow the new trail back to the clubhouse; you never know if someone is using the range.
